IP Transit & Colocation

ABOUT HURRICANE ELECTRIC

Fremont, California-based Hurricane Electric operates its own global IPv4 and IPv6 network and is considered the largest IPv4 and IPv6 backbone in the world as measured by number of networks connected. Within its global network, Hurricane Electric is connected to over 250 major exchange points and exchanges traffic directly with more than 8,000 different networks.

Additional information can be found at:

PUBLIC RELATIONS**

WWW.MILLDAMPR.COM

OUR WORK FOR HURRICANE ELECTRIC

Announcing Widespread Expansion.

Milldam works to promote the colocation services offered by Hurricane in addition to the growth of their IPv6 network and being a first mover in the market segment of IPv6 connectivity.

In 2009, Milldam began working with Hurricane to build brand recognition and awareness around the company's services as they rapidly expanded their IPv6 network across the globe.

We primarily release news about Hurricane's many Points-of-Presence around the world that has generated dozens of articles about the company. We also organize regular networking events in Fremont, CA.

PLACEMENTS & RESULTS

Working with Hurricane Electric since 2009

Articles:	500+
Press Releases:	200+
Interviews:	30+
